SUMMARY

Computer Science graduate (Class of 2026) with three AWS certifications and a strong focus on cloud infrastructure, automation, and CI/CD. Practical experience setting up serverless environments, writing Infrastructure as Code, and building automated deployment pipelines. Looking to bring my hands-on background in AWS, GCP, Linux, and DevOps tools to a junior cloud or infrastructure team.

EDUCATION

Cairo University <i>B.Sc. Computer Science (Faculty of Computers & AI)</i>	Cairo, Egypt 2022 – 2026
--	-----------------------------

SKILLS

Cloud, OS & Infra: AWS (EC2, S3, RDS, Lambda, VPC, IAM, Route 53), GCP (Cloud Run, Cloud Build, Artifact Registry), Linux, Docker
DevOps, Automation & Networking: Infrastructure as Code (Terraform, CloudFormation), CI/CD Pipelines, Monitoring (CloudWatch), Networking (TCP/IP, DNS, Firewalls), Git/GitHub
Languages/Frameworks: Python, C, C++, JavaScript, Bash, Django, React, Three.js, SQL (PostgreSQL)

CERTIFICATIONS & TRAINING

AWS Certified Solutions Architect – Associate	2026
AWS Certified CloudOps Engineer – Associate	2026
AWS Certified Cloud Practitioner	2025
Google GEAR Program Participant <i>Currently completing interactive labs on building modern AI agents.</i>	Aug. 2026 – Present

EXPERIENCE

Gastec <i>IT Intern</i>	Cairo, Egypt August 2025
– Worked with the IT team to monitor infrastructure health and support enterprise network security using Fortinet firewalls. – Got hands-on experience with IT system integrations and day-to-day infrastructure operations.	
Elements Developments <i>Real Estate Sales Representative</i>	Remote / US Account Sept. 2024 – Nov. 2024
– Managed daily outbound sales calls for a US-based real estate account, consistently hitting targets while improving my professional English and communication skills.	

PROJECTS

Atlas of Stories | *React, Node.js, GCP, Docker, Terraform, CI/CD, Gemini API*

- Built a full-stack mapping app that uses the OpenLibrary and Google Gemini APIs to pull real-world locations from books and display them on an interactive map using MapLibre GL.
- Set up the serverless cloud infrastructure on GCP (Cloud Run, Firestore) from scratch using Terraform, and kept API keys secure with GCP Secret Manager.
- Created an automated CI/CD pipeline using Google Cloud Build that packages the app in Docker, pushes it to Artifact Registry, and deploys it directly to Cloud Run.

Personal Portfolio 3D Interactive Website | *React, Three.js, Vercel*

- Coded a custom, interactive 3D portfolio website using React and Three.js to showcase my projects and certifications.
- Deployed and hosted the live site on Vercel.
